

Cinema ProPack 600

SUB135S

Amplifier/Subwoofer

SERVICE MANUAL

JBL Consumer Products
250 Crossways Park Dr.
Woodbury, New York 11797

Rev1 04/03

Note: The SUB135S is part of the SCS135S system, which is part of the JBL Cinema Propack 600 system.

Satellite loudspeakers 135SAT are replacement-only; order JBL part# SAT135.

BASIC SPECIFICATIONS

SUB135S Subwoofer

Configuration:	Floor-firing, bass-reflex ported enclosure
Woofers:	8" cone
Amplifier Power output:	100W Continuous RMS power @ 0.8% THD, 20Hz to 100Hz
LFE Input Voltage/Impedance:	2V p-p/47k ohms
Dimensions:	Width: 13 inches (330mm) Height: 15 inches (381mm) Depth: 14 inches (356mm)
Weight:	30 lb/13.6kg

Occasional refinements may be made to existing products without notice but will always meet or exceed original specifications unless otherwise stated

SUB135S Cinema ProPack 600

SUB135S 100W Powered Amplifier

LINE VOLTAGE	Yes/No	Hi/Lo Line	Unit	Notes	
US 120vac/60Hz	Yes	108-132	Vrms	Normal Operation	
Asia 100vac/50Hz	Yes	90-110	Vrms	Normal Operation	

Parameter	Specification	Unit	QA Test Limits	Conditions	Notes

Turn-on Transient	50	mV-peak	100	@ Speaker Outputs	AC Line cycled from OFF to ON
Turn-off Transient	50	mV-peak	100	@ Speaker Outputs	AC Line cycled from ON to OFF
Efficiency					
Stand-by Input Power	13	Watts	15	@ nom. line voltage	Maximum allowable input power under nominal Input voltage and frequency, HOT or COLD operation.
Power Cons.@rated power	185	Watts	195	@ nom. line voltage	100 Watts @ 4 Ohms nominal line voltage
Protection					
Short Circuit Protection	YES	--	functional	Direct short at output	
Thermal Protection	65 deg. C	--	functional	@ 1/8 max unclipped Power	Temperature rise should not exceed 35K rise
DC Offset Protection	YES	--	functional	DC present at Speaker Out leads	Relay or crowbar (for driver/fire protection)
Line Fuse Rating	2.5	Amps	2.5	Type-T or Slo Blo	External fuse with UL/SEMKO rated holder

Operating the SUB135S Subwoofer

LFE Input: Connect to **LFE/Subwoofer Output** on rear panel of DCR600 receiver using the single-lead RCA cable with brown connectors.

LED: Lights green when a low-frequency signal is present and the subwoofer is playing. Lights red when no low-frequency audio signal is present to indicate that the subwoofer is plugged in, powered on and in the Standby mode.

Power Switch: Turn the power switch to the "•" (dot) position to power the unit on. The SUB135S subwoofer will automatically turn itself on and go into Standby (Sleep) mode when left in the On position. When your DCR600 is off, or is not sending program material to the subwoofer, the subwoofer will be in Standby mode. When the subwoofer senses an audio signal, it will automatically turn itself on. If the subwoofer does not sense a signal after approximately twenty minutes, it will automatically go into Standby mode. If you will be away from home for an extended period of time, or if

the subwoofer will not be used, turn this switch off to conserve electricity and for safety.

AC Power Cord: Plug the power cord into an unswitched outlet.

SUB135S Test Set Up and Procedure

SYSTEM AURAL SWEEP TEST

Equipment needed:

- Function/signal generator/sweep generator
- Integrated Amplifier
- Multimeter

General Unit Function (UUT = Unit Under Test)

1. From the signal generator (set initially at 0 volts), connect one line level (RCA) cable to the SUB135S LFE jack on the UUT.
2. Plug in the power cord; turn the power switch ON. LED should be Red.
3. Turn up the generator and adjust to **300mV, 40 Hz**. LED should now be Green.
4. Immediate bass response should be heard and felt from port tube opening.

Sweep Function

1. Follow steps 1-4 above, using a sweep generator as a signal source.
2. Sweep generator from 20Hz to 1kHz. Listen to the cabinet and drivers for any rattles, clicks, buzzes or any other noises. If any unusual noises are heard, remove woofer and test.

Driver Function (Woofer)

1. Remove woofer from cabinet; detach the + and - wire clips.
2. Check DC resistance of woofer; it should be **3.4 ohms $\pm 10\%$** .
3. Connect a pair of speaker cables to driver terminals. Cables should be connected to an integrated amplifier fed by a signal generator. Turn on generator and adjust so that speaker level output is **5.0V**.
5. Sweep generator from 20Hz to 1kHz. Listen to driver for any rubbing, buzzing, or other unusual noises.

Caution: take care to replace the + and - wire clips on the correct terminals, as they are the same size. Red wire should connect to the red dot on the terminal.
